PERSONAL SUMMARY

Full-stack developer with experience in Python, JavaScript, and cloud-deployed applications. I build clean, scalable products and thrive in collaborative team environments.

WORK EXPERIENCE

Software Developer (Kodakit) — Remote

- Built and deployed a data analytics site using **Next.js**, **TypeScript**, and **Framer Motion** to showcase projects.
- Customized Odoo 16 modules for e-commerce and POS systems, streamlining workflow for small businesses.

Frontend + Backend Developer — Insightseller — Ankara, Turkey

- Developed responsive, dynamic web apps using **Angular** and **Node.js**, improving UX across the platform. Collaborated with stakeholders to translate business requirements into technical solution
- Enhanced performance of PostgreSQL queries and implemented secure back-end endpoints for data-heavy processes.

PROJECTS

SubTrack — Subscription Tracker (React Native, Expo, Firebase)

- Built and launched a mobile app to track personal subscriptions, available on Google Play Store.
- Implemented Firebase authentication, real-time data sync, and push notifications
- Managed full release cycle including store listing, closed testing, and Play Store deployment

AI-Powered Budget Travel Planner — Graduation Project (NestJS, React Native, PostgreSQL)

- Leading a team building a full-stack travel planning app with AI-driven budget recommendations
- Built and deployed a REST API with JWT auth, refresh token rotation, Redis rate limiting, and OTP/QR pass system
- Integrated Cloudinary for media upload, SendGrid for email notifications, and deployed backend on Railway
- Built React Native frontend covering auth, live trip tracking, budget charts, and offline mode
